- Refactored real-world production codebases by identifying and fixing 15+ bugs, improving page performance scores by 25% across key user flows.

PROJECTS

MealMOB App (Food Delivery Website)

Feb 2025 – May 2025

[Project-link](#) and [Code \(GitHub\)](#) | Personal Project

Developed and launched a full-stack food delivery platform from scratch using MERN stack, supporting 5+ core user flows (login, search, menu, cart, checkout).

- Architected a vendor dashboard with full CRUD functionality using RESTful APIs, enabling restaurant onboarding without any manual backend intervention.
- Implemented secure JSON Web Token (JWT) authentication with protected routing, ensuring zero unauthorised access to user-specific data.

Tech Stack: React.js, Node.js, Express.js, MongoDB, RESTful APIs, JWT Authentication.

JobPilot-AI (AI-Powered Job Application Tracker Resume Tailoring Platform) *May 2026 – Jun 2026*
[Project-link](#) and [Code \(GitHub\)](#) | *Personal Project*

Built a full-stack AI application that helps job seekers track applications, analyze ATS compatibility, and generate job-specific tailored resumes from LaTeX source files using AI.

- Tracked job applications with status management, resume versioning, and application analytics.
- Analyzed job descriptions to generate ATS scores, identify missing skills/keywords, and create tailored LaTeX resumes while preserving the original resume format.

Tech Stack: Next.js, TypeScript, PostgreSQL, Prisma, Gemini API, Tailwind CSS, ShadCN UI, Cloudflare R2, LaTeX, Docker.
